

C4 Architecture Diagrams — Centralized College Merchandise Management System

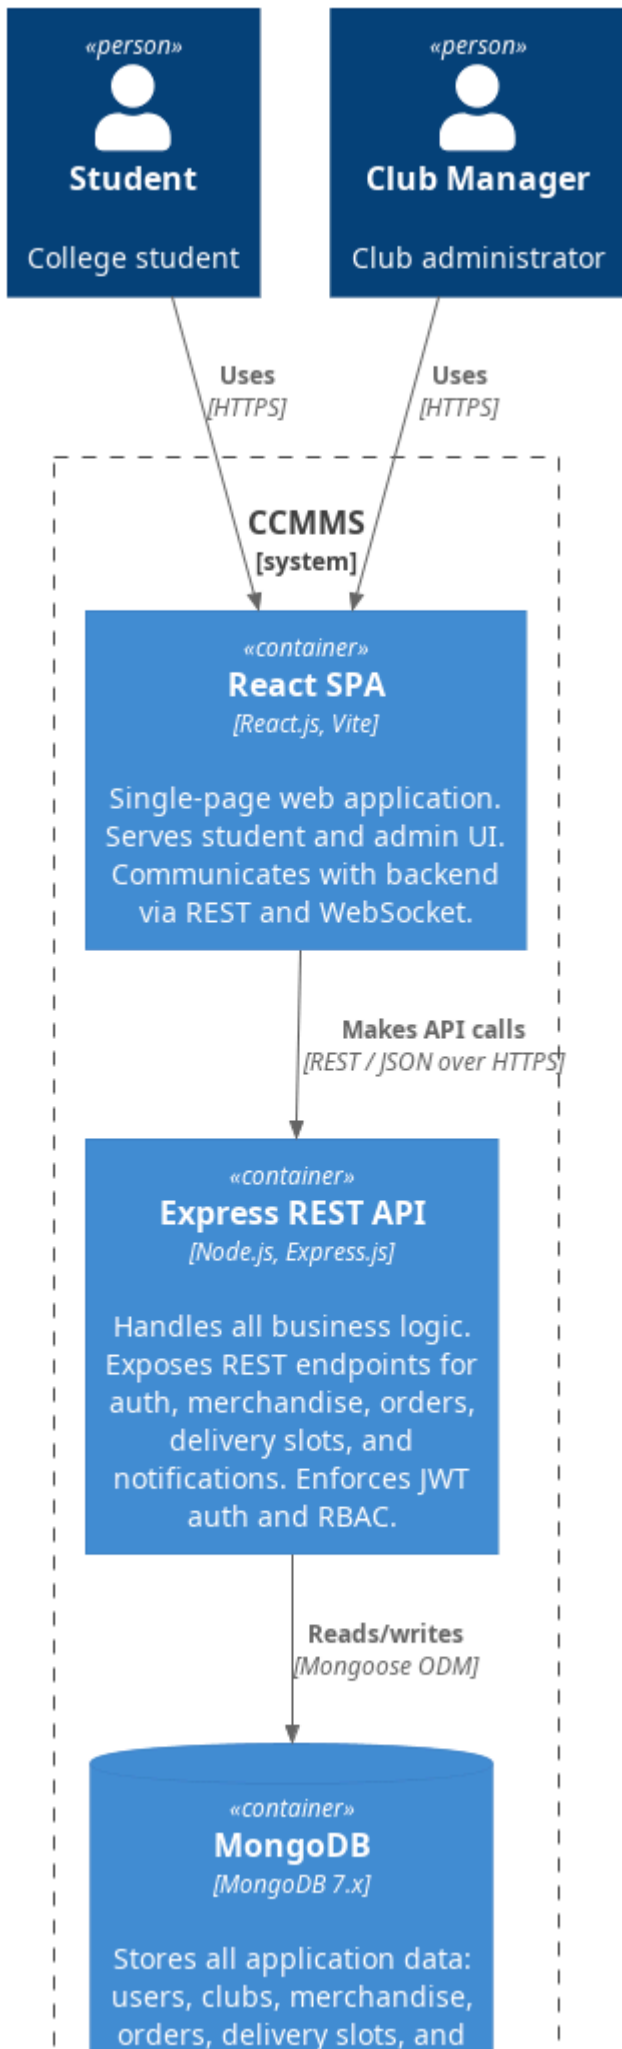

Level 1 — System Context Diagram

Shows how the CCMMS system fits into the world and who interacts with it.

Level 2 — Container Diagram

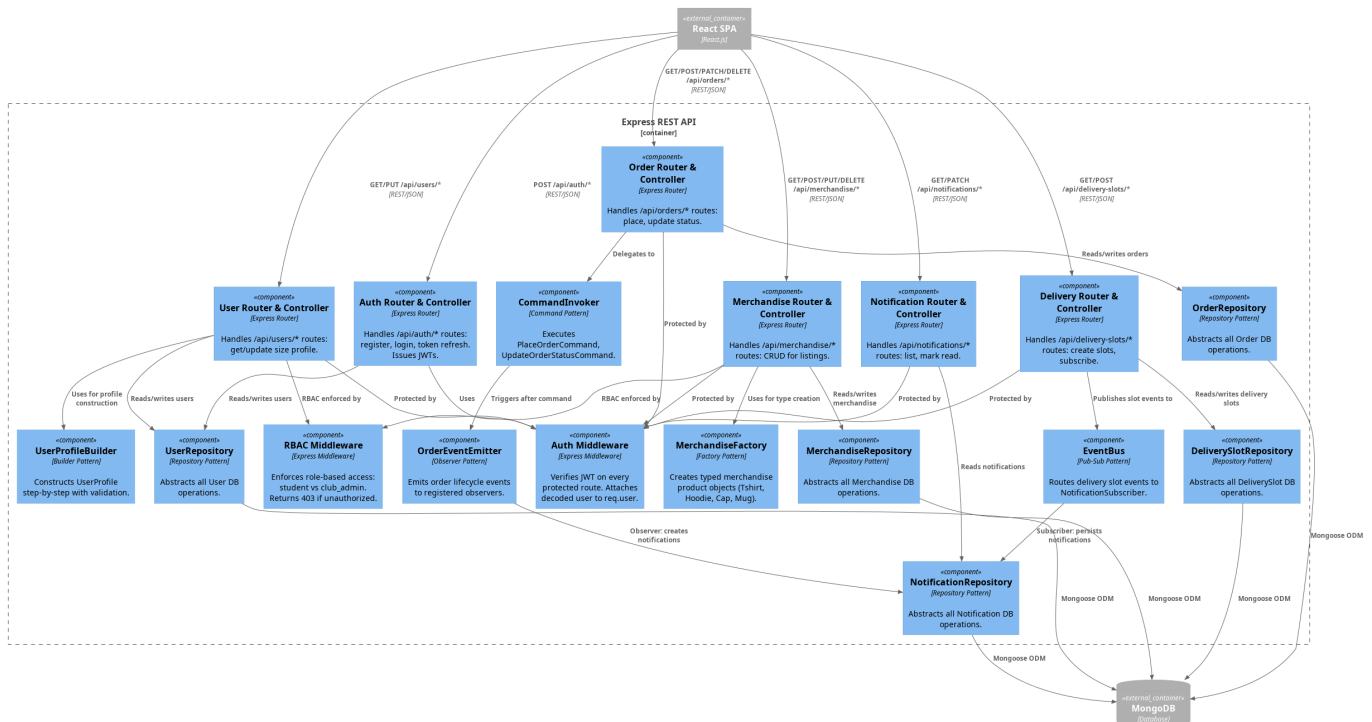

Shows the major containers (applications and data stores) inside CCMMS and how they interact.

notifications.

Level 3 — Component Diagram (Express REST API)

Zooms into the Express REST API container, showing its internal components and their responsibilities.

Architecture Layers Summary

C4 Level	Focus	Diagram
Level 1 — System Context	External actors + system boundary	Students, Club Admins → CCMMS → Email Service
Level 2 — Container	Technology containers + communication	React SPA ↔ Express API ↔ MongoDB
Level 3 — Component	Internal components of Express API	Routers, Middleware, Patterns, Repositories
